---

The mine is on BLM land and Interior did the EIS long ago which I believe a court ruled still valid. This is the Canyon mine located about 6 miles southeast of Tusayan, AZ on the south side of the Grand Canyon.

Shelly –  
We might. It depends on who the lead federal agency would be. Would EPA's approval action trigger the need for EPA to prepare an EIS? Will some other federal agency be preparing an EIS? What's the name of the mine? I'll ask Jeannie Geselbracht to give you a call. She can help you sort out whether or not ERO needs to be involved.  
Thanks –  
-Kathy

Kathy  
We'll soon be receiving an application for approval to construct a uranium mine in Arizona. Is this something the Environmental Review Office would be interested in?
